

Pedigreed Bale Certification Score Sheet

A 1.0 rating is granted to a system that logs the operating temperatures of all conditioning equipment, critical moistures, key operator set points, and the permanent bale ID in a computer database. The following deducts apply:

Item	Credits	Deducts	Criteria
1		0.1	Some critical moistures missing
		0.2	All critical moistures missing
2		0.1	Some drying temps missing
		0.2	All drying temps missing
3		0.1	Some moisture restoration temps missing (if applicable)
		0.2	All moisture restoration temps missing (if applicable)
4		0.1	Some key operator setpoints missing
		0.2	All key operator setpoints missing
5		0.2	Does not record bale ID
6		0.2	Records data in printed report instead of a database
7		up to 1.0	Lack of training, skilled operators, or acceptable oversight

* Please note that additional requirements may be added as they are recommended and approved.

Notes:
