

## Bale Checklist

- Staple
- Strength
- Color
- Leaf
- Micronaire
- No Water Spray
- Safe Drying Temps
- Trained Gin Operators
- Contamination Prevention Policy

Are you missing some *critical* information about the cotton bales you buy?

Scorching drying temperatures,

water sprays on lint, contamination, and unqualified or uncaring operators can result in problems that don't show up on the grade sheet, but do show up in spinning. Protect yourself from these problems and make the surprises in your bales pleasant ones. Look for cotton from Certified Cotton Gins.
