

ON A TREASURE HUNT FOR GOOD COTTON?

WE CAN SHOW YOU THE WAY.

There are millions of bales of U.S. cotton in warehouses looking for a good home. Millions of these bales were subjected to damaging water sprays before being pressed. Many other millions of bales were ginned without water sprays. You can't tell the good bales from the bad by looking at the classing data.

There is only *one* way to find the good bales and profit from great fiber value with confidence.

Welcome to Certified Cotton.
